Federico Sordillo
functional programmer and Technical PM

Holder of strong opinions weakly held.

I have worked on the full spectrum of web technologies, both as a software engineer and as a Technical Project Manager, leading small teams dealing with complex domains.

I prefer strongly typed languages and have a vertical in TypeScript, although in the last few years I have mainly worked on large distributed systems with Go.

Working in all kinds of environments, from big multinationals to smaller tech companies, I experienced firsthand what makes a product successful and the importance of good communication and efficient processes.

Work

Software Engineer & tech lead

Juni

Sep 2022 – Present

Göteborg, Vastra Gotaland County, Sweden

Sketching architectural solutions and leading a small interdisciplinary team. Working in a distributed microservices environment with Kafka. Kubernetes and Go on the backend and Typescript on the frontend. Applying DDD and clean architecture.

Web Development Consultant

Freelance Web Development

Feb 2020 – May 2023

Milan Area, Italy

As a consultant, I specialize in front-end technologies, but I try to keep an all-round flexible approach. I help customers shaping their internal processes and Agile methodologies while creating high-quality software that meets business requirements in the most efficient and effective way.
